

NANOSUNSCREEN

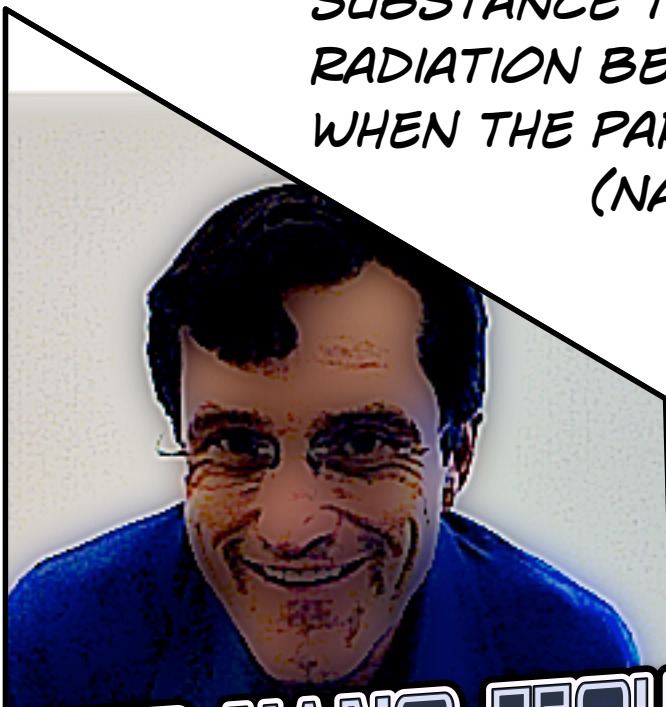

IF ONLY I HAD NANOSUNSCREEN I WOULDN'T HAVE THIS PAINFUL SUNBURN FROM BIKING.

Before Nano Tech

HOW? - "NANO PARTICLES OF ZINC OXIDE OR TITANIUM DIOXIDE ARE USED IN SUNSCREENS BECAUSE THE WHITE SUBSTANCE THAT ABSORBS ULTRA VIOLET RADIATION BECOMES MORE TRANSPARENT WHEN THE PARTICLES ARE NANO SIZED" (NANOTECHPROJECT.ORG)

WHO? - CROWN LABORATORIES IN
WHERE? - AUSTRALIA
WHEN? - LAUNCHED IN 1995
WHY? - DEVELOPED BECAUSE AUSTRALIA HAS THE MOST INTENSE UV EXPOSURE (FROM THE CURVATURE OF EARTH AND THE ANGLE THAT THE RAYS HIT THE PLANET)

AFTER NANO TECH
